

Bio Stimulant - AzoSpi N

A liquid azosperillium myco-rrhyza product that can be applied as a seed treatment or foliar spray in many different crops and in many different applications. This well-known product surpassed all competition during a sweet corn trial in Rockford, Illinois USA in the summer of 2017 where the plant mass at the R1 stage of development was 32% greater than the control group and the yield was 17% greater at harvest.
